TERRE PROMISE

BELGIUM

## OUR SOUL

Terre Promise creates and designs contemporary ceramic lighting that invite you on a sensory journey through the natural beauty of the material. Our creations transcend their utilitarian function, approaching pieces of art that captivate the eye and illuminate living spaces.

Born in Europe's most cosmopolitan city, Brussels inspires us. We meticulously select natural clays and aggregates from different territories, and blend them to create chromatic and tactile surfaces that invite the touch. Our creations share the organic energy and poetry of the earth, recalling memories of landscapes we have encountered.

## PROPOSITION

Terre Promise creates lamps that awaken the imagination, inspire reverie and invite a connection to nature and the self, inviting us to a moment of pause. By using raw materials and highlighting the textures and nuances of the earth, we celebrate the harmony between ancestral know-how and the magic of contemporary creation. Our aim is to enable architects and interior designers to transform any space into a naturally welcoming, contemporary and warm place.

# T E R R E P R O M I S E

QUALITY MATERIALS, CRAFTSMANSHIP AND PASSION.

We believe in the values of craftsmanship and advocate its excellence. Each piece is created with a fresh eye, a profound questioning of the status quo. Terre Promise pushes the boundaries of ceramics through a contemporary approach to the craft and the creation of new techniques. Our craftsmen adapt traditional methods and give soul to their creations to create one-of-a-kind pieces that celebrate the beauty of curves and imperfections. We create objects of the highest quality, beautifully crafted and tactile.

Each creation inherits a delicate finish where the details are masters, where carefully crafted and subtle forms open the doors to a contrasting universe, both contemporary and timeless.

## CREATION OF BESPOKE LIGHTING

We are proud to create ceramic lamps that become one-of-a-kind, made-to-measure pieces. For these singular creations, every detail, from shapes to finishing materials to colours, can be adapted to the customer's personality and tastes to harmonise perfectly with your space and create exceptional objects that are truly personal.

In the development of bespoke objects, we believe in a collaborative approach during the creative stages. As with the creation of bespoke jewellery, we invite our most demanding customers to exchange ideas during personal consultations, and accompany them in the development of lamps that will reflect their character and style.

For tailor-made table lamps or suspensions, we have developed steps to meet your needs and satisfaction : the first meeting (live or on-line), the initial project proposal, the eventual chromatic and texture research along with firing tests, the production stage, the transportation and the after-sales services.

LOOKING FOR A UNIQUE SHAPE, FINISH OR SIZE ?

Please get in touch with our team, we would be happy discuss about your project.

TERRE PROMISE

## OUR DESIGNER

Dereck Daubechies, a designer fascinated by clay and what it has to offer, has decided to share his passion for excellent craftsmanship. Self-taught in his training and practice, he works with clay to create unique pieces whose energy and poetry express an artistic grace that reflects his passion for the beauty of a gesture and a curve.

Trained from an early age in traditional martial arts, he has cultivated a taste for balance, detail and aestheticism since childhood. Today, trained in the technology of ceramics, he designs, from drawing to realisation, utilitarian and decorative objects that travel between tradition and modernity.

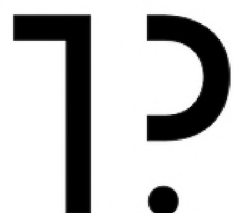

Our designer has been awarded the 2023 BEL Prize in the "Brussels Transmission Expertise" category for his lighting designs.

This prize, awarded by 60 prestigious Brussels companies (Baobab Collection, Delvaux, Marcolini, Natan, etc.) honours an emerging talent for the excellence of its work.
